

J.F.D.I.
Just F****ing
Do It.

AWESOMENESS

Testing

Trust me, it's
worth it.

Quality

Otherwise, why
bother?

Documentation

Separates us from
animals.

Pride

Caffeine

It's not necessary,
but it helps.

Leadership

Restraint

Not every prob-
lem is yours to
solve.

Agility

Be ready to
change horses
mid-stream.

Planning

Just enough is
enough.

Visualization

Essential to
communication.

Confidence

Work without fear.

Candy

There's nothing wrong
with candy.

Process

Understand it,
tend it, live it.

**System
Engineering**

You should know this
too.

**Attention To
Detail**

Notice everything.

Learning

Never stop.

**Separation Of
Concerns**

Keep the elephants out
of the henhouse.

Kaizen

Commit to
continual
improvement.

Encapsulation

**Design
Patterns**

**User
Empathy**

**Service
Oriented
Architecture**

D.R.Y.
Don't repeat
yourself.

**Beautiful
Code**

**Test
Coverage**

**Production
Stability**

It is your problem.

Logging

Don't spew
everything to
stdout.

Footwear

Keep it sensible
and durable.

Toys

Help prevent
insanity.

Proper Dress

Do the opposite of
what's required.

Respect

Command it, apply
liberally to others.

Stress

Without it, life
gets boring fast.

Popular Culture

Know enough to bond
with coworkers. Too much
makes you socially
akward.

Conferences

Networking, training,
and collaboration in one
trip.

Making

What you do
when you aren't
programming.

Actualization

Made up words
make you sound smart.

Trying

Should be
effortless.

Beer

Liquid bread.

Frameworks

Are for people who
can't do it
themselves.

Money

Justifies stress.
Isn't everything.

JOHNSON PYRAMID OF PROGRAMMER GREATNESS
